# TANJUR ZDRAVE PREHRANE

## POVRĆE

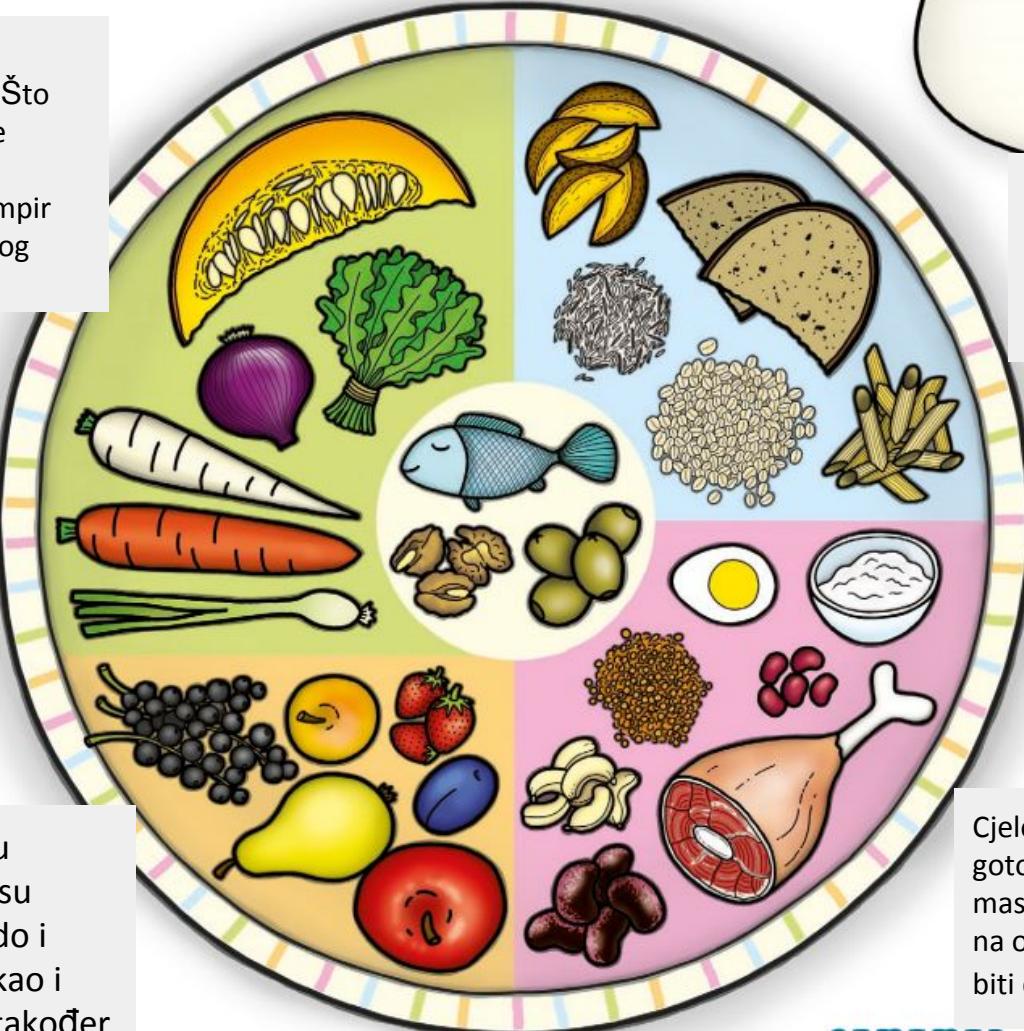

Povrće treba činiti najmanje četvrtinu hrane koju jedemo. Što raznovrsnije i različite metode pripreme, to bolje. Čips se ne računa u grupu povrća, a krumpir pripada grupi polisaharida, zbog svojih svojstava.

## VOĆE

Voće je druga četvrtina tanjura. Najzdravije i najviše nutrijenata dobijemo ako jedemo raznovrsno sezonsko voće.

## ULJA I MASTI

Ulja i masti su vrijedna u zdravoj hranoj, kao što su orašasti plodovi, avokado i riba. Kvalitetan maslac kao i hladna prešana ulja su također pogodna za unos. Umanjeno jedite margarin kao i druga industrijska modificirana ulja i

## PIĆE

Za piće je najbolje koristiti običnu vodu, kao i nezaslađeni čaj. Poželjno bi bilo ne konzumirati zaslađena pića.

## POLISAHARADI

Polisaharde je najbolje korisiti u prirodnom obliku. Kao npr., zrna proса, žitarice, kruh od kiselog tjesteta, tamna riža. Važno je paziti na unos proizvoda od bijelog brašna.

## PROTEINI

Dobri proteini dolaze iz ribe, graška, mahunarki, orašastih plodova, sjemenki, proizvoda od kiselog mlijeka, jaja i mesa. Bolji omjer biljnih proteina bi koristio svima nama. Odaberite prema preferencijama.

## NAČIN ŽIVOTA

Cjelokupno, prirodni i lokalni prozvodi hrane su bolji od gotovih pripremljenih obroka, namirnica niske kvalitete i masovne proizvodnje. Poželjno je baviti se aktivnostima na otvorenom, spavati, provoditi vrijeme s prijateljima te biti dobro raspoložen.

**HRANA KOJA SE  
MOŽE  
KONZUMIRATI  
SVAKODNEVNO:**

- SALATA
- VOĆE (IZUZEV GROŽĐA I BANANE)
- POVRĆE
- PILETINA I MESO SA ŽARA
- KUHANA ŠUNKA
- RIBA SA ŽARA ILI PEĆENA U PEĆNICI
- MLJEKO
- JOGURT
- SVJEŽI SIR

**HRANA KOJA SE  
MORA  
KONZUMIRATI  
UMJERENO**

- MAHUNARKE (SLANUTAK, LEĆA, GRAH, ITD..)
- KUHANI KRUMPIR
- TJESTENINA
- RIŽA
- KRUH
- MASLINOVO ULJE
- JAJA
- BANANE
- GROŽĐE

**HRANA KOJA SE  
KONZUMIRA SAMO  
U POSEBNIM  
PRILIKAMA:.**

- SLATKIŠI
- ZASLAĐENA PIĆA
- KOLAČI
- UMACI
- KOBASICE
- PRŽENA HRANA
- MASLAC
- PUNOMASNI SIR
- ORAŠATO VOĆE
- MASLINE
- ČOKOLADA
- DŽEMOVI
- SLADOLEDI

# VITAMINI SU POTREBNI ZA NORMALNO NAJVEĆI UDIO VITAMINA SE NALAZI U FUNKCIONIRANJE NAŠEG TIJELA VOĆU I POVRĆU

## Know your Vitamins

### Vitamin A

- Also known as RETINOL
- Sources include Carrots, Green leafy vegetables and Sweet Potatoes
- Important for a healthy vision
- Its Deficiency causes NIGHT BLINDNESS also known as XEROPHTHALMIA

### Vitamin B

Also known as VITAMIN B COMPLEX

Sources include Animal and Dairy products

Important for converting food into fuel, thus providing energy to the body

List of Vitamin B includes Vitamin B1, B2, B3, B5, B6, B7, B9 & B12

### Vitamin C

- Also known as ASCORBIC ACID
- Sources include Citrus fruits, Berries & Tomatoes.
- Important for growth & maintenance of all body tissues hence for healing wounds.
- Its Deficiency causes SCURVY

### Vitamin D

Also known as CALCIFEROL

Sources include Fatty fish like Salmon, Egg yolk and Cheese

Important for maintaining strong bones and teeth.

Its Deficiency causes RICKETS

### Vitamin E

### Vitamin K

- Also known as TOCOPHEROL
- Sources include Almonds, Peanuts and Soyabean oil.
- Important for providing immunity and fertility in males
- Its Deficiency causes NERVE DAMAGE

- Also known as PHYLOQUINONE
- Sources include Collard Greens, Kale and Spinach
- Important for Blood Clotting
- Its Deficiency causes HEMORRHAGIC DISEASES

# NOVA PIRAMIDA PREHRANE

# Što se događa s našim tijelom ako predugo sjedimo?

## How Sitting Too Long Affects the Body

**Head**  
Blood clots that form after sitting too rigidly can travel to the brain, causing strokes.

**Lungs**  
In individuals who experience heart failure, fluid first backs up in the lungs.

**Arms**  
Physical activity reduces the risk of hypertension, or high blood pressure.

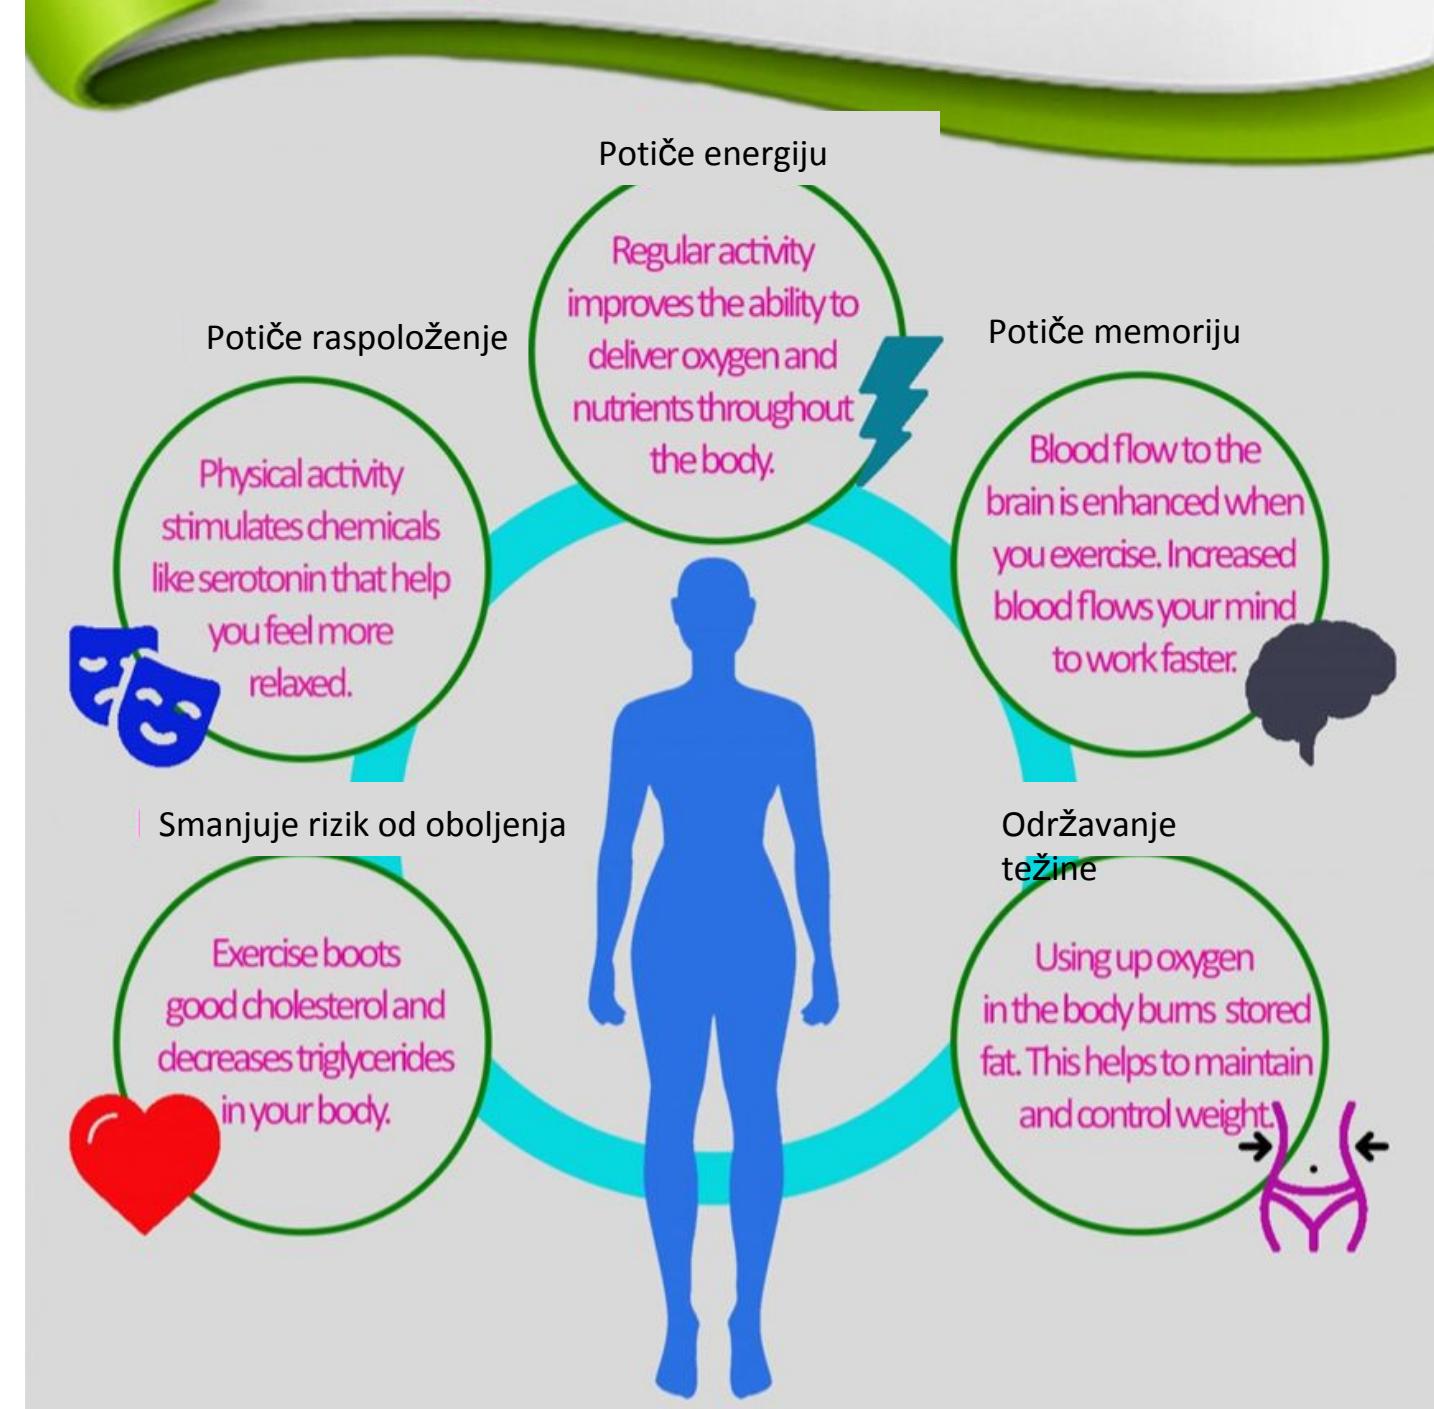

**Stomach**  
Sitting too much contributes to obesity and colon cancer. Enzymes in the blood vessels of muscles responsible for burning fat get shut off, and the body's method of metabolizing fuels such as glucose and lipids gets disturbed.

**Neck**  
Fluid retained in the legs during the day moves to the neck at night and contributes to obstructive sleep apnea.

**Heart**  
A sedentary lifestyle contributes to cardiovascular disease. In people who suffer from heart failure and obstructive sleep apnea, fluid collects in the lungs and neck at night.

**Legs**  
Fluid collects in the legs during sitting. Walking helps pump it out before it causes problems.

# Dobrobiti redovite tjelovježbe

# Možemo vježbati na različite načine

# Dobrobiti kvalitetnog sna
